2.1.2	Biology
2.1.3	Chemistry
2.2	Course Units and Practical Sessions imposing the prior Proficiency
2.2.1	Clinical practice in receiving professional skills and experience of professional activity (Procedure nursing assistant)
2.2.2	Basementsofemergency
2.2.3	Facultytherapy
2.2.4	Hospitaltherapy
2.2.5	Clinical practice in receiving professional skills and experience of professional activity (charge nurse assistant)
2.2.6	Clinical practice(hospital doctor assistant)
2.2.7	Nursingcare
2.2.8	Propaedeuticsofinternaldiseases

3. STUDENTS' COMPETENCIES RESULTING FROM THE COURSE UNIT (MODULE)	
GC-5: readiness to self-development, self-realization, self-education, usage of creative potential	
Knowledge:	
Level 1	The process and mechanisms and self-realization of person
Level 2	Several characteristics of process and mechanisms of self-development and self-realization
Level 3	The significant characteristics of process of self-development and self-realization
Skills:	
Level 1	To make a choice of potential personal abilities and possibilities for performing activity
Level 2	To realize personal abilities in different kinds on activity demonstrating a creative approach to situations resolution
Level 3	To make an argument choice of personal abilities and possibilities when doing independent creative realization of various kinds of activity with considering goal and conditions of its performing
Expertise:	
Level 1	The particular technique of self-development and self-realization
Level 2	The particular technique of self-development and self-realization realizes free personal choice of techniques in standard situations
Level 3	The complete system of techniques of self-development and self-realization demonstrating a creative approach in choice of technique with considering certain and uncertain situation in professional and other fields of activity

GPC-10: readiness to providing patient's care organization and providing first medical-sanitary aid	
Knowledge:	
Level 1	The general rules of providing patient's care organization and first medical-sanitary aid
Level 2	The specific of general methods in patient's care organization and first medical-sanitary aid
Level 3	The general methods of patient's care organization and first medical-sanitary aid
Skills:	
Level 1	To disclose purpose of patient's care organization and first medical-sanitary aid
Level 2	To compare different methods of patient's care organization and first medical-sanitary aid
Level 3	To notice practical benefits of concrete methods in patient's care organization and first medical-sanitary aid
Expertise:	
Level 1	Skills of readiness of providing patient's care organization and first medical-sanitary aid
Level 2	Approaches to searching and detecting of general methods of patient's care organization and first medical-sanitary aid
Level 3	The assessment, differentiative skills of general methods in patient's care organization and first medical-sanitary aid

Final Students' Competences

3.1	Knowledge:
3.1.1	The importance of nursing care
3.1.2	The general principles of nursing
3.1.3	The ethics and deontology of nursing
3.1.4	The types of cleaning units, dressing units, rules of work with disinfectant solutions
3.1.5	The rules of personal hygiene
