### 2. THE PLACE OF THE DISCIPLINE IN THE STRUCTURE OF THE EDUCATIONAL PROGRAM

Cycle (section) of the PLO:	B1.O.03
<b>2.1</b>	<b>Requirements for the preliminary training of the student:</b>
2.1.1	Human Anatomy
2.1.2	Chemistry
2.1.3	General and Medical Psychology
2.1.4	General Care for Therapeutic Patients
2.1.5	Kyrgyz Language and Literature
2.1.6	Russian Language and Literature (Beginner Level)
2.1.7	Mathematical and natural science cycle
<b>2.2</b>	<b>Disciplines and practices for which the development of this discipline (module) is necessary as a previous:</b>
2.2.1	Pathophysiology, clinical pathophysiology
2.2.2	Topographic Anatomy and Operative Surgery
2.2.3	Propaedeutics of Internal Diseases
2.2.4	Faculty Therapy
2.2.5	Hospital Therapy
2.2.6	Infectious diseases with a course of tropical infectious diseases
2.2.7	Medical Rehabilitation
2.2.8	Family Medicine
2.2.9	Faculty Surgery
2.2.10	Hospital surgery
2.2.11	Outpatient surgery
2.2.12	Basics of Emergency Care
2.2.13	General Care for Therapeutic Patients
2.2.14	General Care for Surgical Patients
2.2.15	Ward Nurse Assistant
2.2.16	Procedural Nurse Assistant
2.2.17	Obstetrics and Gynecology Physician Assistant
2.2.18	Surgical Assistant
2.2.19	Assistant Emergency Medical Doctor
2.2.20	Assistant doctor of an outpatient clinic
2.2.21	Obstetrics and Gynecology Physician Assistant

### 3. COMPETENCIES OF THE STUDENT FORMED AS A RESULT OF MASTERING THE DISCIPLINE (MODULE)

**SLK-4: Able and willing to carry out its activities taking into account the moral and legal norms accepted in society, to comply with laws and regulations on working with confidential information, to bear social and ethical responsibility for the decisions made.**

**Know:**

Knows moral and legal norms in professional activities

**Be able to:**

Observes moral and legal norms in professional activities

**Own:**

Uses modern information and communication technologies and software to present information in the formulation and solution of professional tasks

**PC-1: Able and willing to comply with the rules of medical ethics, laws and regulations on working with confidential information, and maintain medical confidentiality.**

<b>Know:</b>
the basics of moral and legal knowledge and the basic ethical and deontological principles of the work of medical workers and their specifics.
<b>Be able to:</b>
- To determine the specifics of legal knowledge in various spheres of life; - To reveal the meaning of the basic ethical and deontological principles of the work of a medical doctor;
<b>Own:</b>
- Skills of communication with the patient, in a medical team in compliance with the ethical and deontological principles of work; - Methods of searching and comparing various features of the ethical and deontological principles of the work of medical staff depending on the specialty;

**PC-17: Able and ready to perform basic therapeutic measures for the most common diseases and conditions in the adult population and children on an outpatient and inpatient basis.**

<b>Know:</b>
- Etiology, pathogenesis, clinical presentation of the main diseases with various nosological forms.
<b>Be able to:</b>
- Correctly identify this disease.
<b>Own:</b>
- Skills in analyzing various types of treatment of patients with different nosological forms

**PC-22: Able and willing to apply rehabilitation measures (medical, social and professional) to the population for the most common pathological conditions and injuries of the body.**

<b>Know:</b>
- Clinical manifestations of acute and chronic diseases in patients in need of medical rehabilitation and sanatorium-resort treatment
<b>Be able to:</b>
- Link symptoms, examination data and indicators of laboratory and instrumental examination methods into a single whole and make the correct diagnosis.
<b>Own:</b>
- Skills to identify signs of acute illness or exacerbation of chronic disease in patients.

**PC-28: Able and ready to ensure the rational organization of the work of middle and junior medical personnel of medical institutions.**

<b>Know:</b>
- Fundamentals of management in the field of public health and principles of organization in the field of health care. - Principles of management in the field of public health by medical organizations and their structural divisions.
<b>Be able to:</b>
- Apply the principles of organization and management in the field of health
<b>Own:</b>
- Basic principles of organization and management, and their structural subdivisions in the field of public health.

**As a result of mastering the discipline, the student must**

<b>3.1</b>	<b>Know:</b>
Knows moral and legal norms in professional activities	
the basics of moral and legal knowledge and the basic ethical and deontological principles of the work of medical workers and their specifics.	
- Etiology, pathogenesis, clinical presentation of the main diseases with various nosological forms.	
- Clinical manifestations of acute and chronic diseases in patients in need of medical rehabilitation and sanatorium-resort treatment	
- Fundamentals of management in the field of public health and principles of organization in the field of health care. - Principles of management in the field of public health by medical organizations and their structural divisions.	
<b>3.2</b>	<b>Be able to:</b>
Observes moral and legal norms in professional activities	
- To determine the specifics of legal knowledge in various spheres of life; - To reveal the meaning of the basic ethical and deontological principles of the work of a medical doctor;	
- Correctly identify this disease.	
- Link symptoms, examination data and indicators of laboratory and instrumental examination methods into a single whole and make the correct diagnosis.	

- Apply the principles of organization and management in the field of health	
<b>3.3</b>	<b>Own:</b>
Uses modern information and communication technologies and software to present information in the formulation and solution of professional tasks	
- Skills of communication with the patient, in a medical team in compliance with the ethical and deontological principles of work; - Methods of searching and comparing various features of the ethical and deontological principles of the work of medical staff depending on the specialty;	
- Skills in analyzing various types of treatment of patients with different nosological forms	
- Skills to identify signs of acute illness or exacerbation of chronic disease in patients.	
- Basic principles of organization and management, and their structural subdivisions in the field of public health.
