-----	---

**2. THE PLACE OF THE DISCIPLINE IN THE STRUCTURE OF THE EDUCATIONAL PROGRAM**

Cycle (section) of the PLO:	B2.O
<b>2.1</b>	<b>Requirements for the preliminary training of the student:</b>
2.1.1	Russian Language
2.1.2	Medical Biology
2.1.3	Normal physiology
2.1.4	Biochemistry
2.1.5	Anatomy
2.1.6	Orientation Practice (General Care for Therapeutic Patients)
2.1.7	Orientation Practice (General Surgical Care)
<b>2.2</b>	<b>Disciplines and practices for which the development of this discipline (module) is necessary as a previous:</b>
2.2.1	Pathophysiology, clinical pathophysiology
2.2.2	Practice in Emergency Medical Manipulations (Fundamentals of Emergency Care)
2.2.3	Emergency Medical Manipulation Practice (Emergency Medical Assistant)
2.2.4	Clinical pathanatomy
2.2.5	Pathological anatomy
2.2.6	Histology, embryology, cytology
2.2.7	Microbiology, virology
2.2.8	Obstetrics and Gynecology Practice (Medical Assistant)
2.2.9	General Medical Practice (Outpatient Physician Assistant)
2.2.10	Therapeutic Practice (Physician Assistant)
2.2.11	Outpatient therapy with a course of gerontology
2.2.12	Hospital Therapy
2.2.13	Faculty Therapy

**3. COMPETENCIES OF THE STUDENT FORMED AS A RESULT OF MASTERING THE DISCIPLINE (MODULE)**

**UK-4: Able to apply modern communication technologies, including in a foreign language(s), for academic and professional interaction**

**Know:**

rules and patterns of personal and business oral and written communication

**Be able to:**

apply in practice business communication in oral and written forms, methods and skills of business communication in Kyrgyz, Russian and foreign languages

**Own:**

skills of reading and translating texts in a foreign language in professional communication

**UK-6: Able to identify and implement priorities for their own activities and ways to improve them based on self-esteem and lifelong education**

**Know:**

methods of self-assessment, self-control and self-development using health-saving approaches

**Be able to:**

Effectively plan and control your own time

**Own:**

methods of managing one's own time, technologies and skills for managing one's cognitive activity and its improvement on self-assessment, self-control and principles of self-education throughout life, including the use of health-saving approaches and methods.

**UK-8: Able to create and maintain safe living conditions in everyday life and in professional activities to preserve the natural environment, ensure the sustainable development of society, including in the threat and occurrence of emergencies and military conflicts**

**Know:**

classification and sources of emergencies of natural and man-made origin

**Be able to:**

maintain safe living conditions

**Own:**

methods of forecasting the occurrence of dangerous or emergency situations

**OPK-1: Able to implement moral and legal norms, ethical and deontological principles in professional activities**

**Know:**

the basics of moral and legal knowledge and the basic ethical and deontological principles of the work of medical workers and their specifics

**Be able to:**

To determine the specifics of legal knowledge in various spheres of life

**Own:**

Skills of communication with the patient, in a medical team in compliance with ethical and deontological principles of operation

**OPK-2: Able to carry out and monitor the effectiveness of measures for prevention, the formation of a healthy lifestyle and sanitary and hygienic education of the population**

**Know:**

A set of measures aimed at preserving and strengthening health, the formation of a healthy lifestyle and factors affecting human health

**Be able to:**

Prevent the occurrence and (or) spread of diseases, their early diagnosis and causes of their occurrence;

**Own:**

Comprehensive measures aimed at preserving and strengthening health and forming a healthy lifestyle

**OPK-4: Able to use medical devices provided for by the procedure for the provision of medical care, as well as conduct examinations of the patient in order to establish a diagnosis**

**Know:**

medical devices provided for by the procedure for the provision of medical care;

**Be able to:**

to determine the scope of application of medical devices provided for by the procedures for the provision of medical care

**Own:**

Skills in identifying medical devices, the scope of their application and the algorithm of use for the provision of medical care

**OPK-6: Able to organize patient care, provide primary health care, ensure the organization of work and make professional decisions in emergency conditions at the pre-hospital stage, in emergency situations, epidemics and in the centers of mass destruction**

**Know:**

Basic Rules for the Organization of Patient Care and the Provision of Primary Health Care in Emergency Conditions at the Prehospital Stage, in Emergency Situations, Epidemics and in Centers of Mass Destruction

**Be able to:**

To reveal the meaning of the organization of patient care and the provision of primary health care in emergency conditions at the pre-hospital stage, in emergency situations, epidemics and in the centers of mass destruction

**Own:**

Skills of preparedness to ensure the organization of patient care and the provision of primary health care in emergency conditions at the pre-hospital stage, in emergency situations, epidemics and in the centers of mass destruction

**OPK-8: Able to implement and monitor the effectiveness of the patient's medical rehabilitation, including the implementation of individual rehabilitation and habilitation programs for the disabled, to assess the patient's ability to work**

<b>Know:</b>
Clinical manifestations of acute and chronic diseases in patients in need of medical rehabilitation and habilitation of disabled people
<b>Be able to:</b>
to carry out measures of medical rehabilitation of the patient, incl. during the implementation of individual rehabilitation and habilitation programs for a disabled person within the framework of primary health care
<b>Own:</b>
Skills in prescribing non-drug methods of treatment for patients of various profiles, correctly assess the tolerance, adequacy and effectiveness of the rehabilitation measures carried out, incl. in the implementation of individual rehabilitation and habilitation programs for a disabled person within the framework of primary health care

**OPK-9: Able to implement the principles of quality management in professional activities**

<b>Know:</b>
Basic Principles of Quality Management
<b>Be able to:</b>
Analyze the conditions for the application of laws, categories and methods of management in medical institutions
<b>Own:</b>
Skills in analyzing the characteristics of the main models of health care organization, laws, categories and methods

**PC-14: Capable of maintaining medical records.**

<b>Know:</b>
List and characteristics of accounting and reporting medical documentation in medical organizations of a medical profile
<b>Be able to:</b>
Conduct medical and statistical analysis of health indicators of the attached population;
<b>Own:</b>
• Work skills and methods of maintaining accounting and reporting documentation of various nature in medical institutions;

**As a result of mastering the discipline, the student must**

<b>3.1</b>	<b>Know:</b>
	rules and patterns of personal and business oral and written communication
	methods of self-assessment, self-control and self-development using health-saving approaches
	classification and sources of emergencies of natural and man-made origin
	the basics of moral and legal knowledge and the basic ethical and deontological principles of the work of medical workers and their specifics
