2. THE PLACE OF THE DISCIPLINE IN THE STRUCTURE OF THE EDUCATIONAL PROGRAM

Cycle (section) of the PLO:	B1.B
2.1	Requirements for the preliminary training of the student:
2.1.1	Anatomy
2.1.2	Pathological anatomy
2.1.3	Propaedeutics of Internal Diseases
2.1.4	Normal physiology
2.2	Disciplines and practices for which the development of this discipline (module) is necessary as a previous:
2.2.1	Infectious diseases
2.2.2	Immunoprophylaxis of infectious diseases
2.2.3	Hospital surgery
2.2.4	Hospital Therapy
2.2.5	Family Medicine
2.2.6	Oncology, radiation therapy
2.2.7	Phthisiology
2.2.8	Faculty Therapy

3. COMPETENCIES OF THE STUDENT FORMED AS A RESULT OF MASTERING THE DISCIPLINE (MODULE)

PC-10: readiness to provide medical care for sudden acute diseases, conditions, exacerbation of chronic diseases that are not accompanied by a threat to the patient's life and do not require emergency medical care

Know:

principles of medical care for acute diseases, conditions and exacerbations of chronic diseases that do not require emergency medical care.

Be able to:

to provide medical care to patients with acute diseases, conditions and exacerbations of chronic diseases within its competence.

Own:

skills of diagnosis, treatment and dynamic monitoring of patients in conditions not accompanied by life-threatening

PC-8: ability to determine the tactics of management of patients with various nosological forms

Know:

- Etiology, pathogenesis, clinical presentation of major diseases with various nosological forms.

Be able to:

- Correctly identify this disease.

Own:

- Skills in analyzing various types of treatment of patients with different nosological forms.

PC-6: the ability to determine the patient's main pathological conditions, symptoms, disease syndromes, nosological forms in accordance with the International Statistical Classification of Diseases and Health-Related Problems, X revision

Know:
the main pathological conditions, symptoms, syndromes and nosological forms of diseases in accordance with ICD-10.
Be able to:
determine the patient's pathological conditions, symptoms, syndromes and formulate a diagnosis in accordance with ICD-10.
Own:
skills in clinical diagnosis and interpretation of examination data to establish a diagnosis in accordance with ICD-10.

As a result of mastering the discipline, the student must

3.1	Know:
principles of medical care for acute diseases, conditions and exacerbations of chronic diseases that do not require emergency medical care.	
- Etiology, pathogenesis, clinical presentation of major diseases with various nosological forms.	
the main pathological conditions, symptoms, syndromes and nosological forms of diseases in accordance with ICD-10.	
3.2	Be able to:
to provide medical care to patients with acute diseases, conditions and exacerbations of chronic diseases within its competence.	
- Correctly identify this disease.	
determine the patient's pathological conditions, symptoms, syndromes and formulate a diagnosis in accordance with ICD-10.	
3.3	Own:
skills of diagnosis, treatment and dynamic monitoring of patients in conditions not accompanied by life-threatening .	
- Skills in analyzing various types of treatment of patients with different nosological forms.	
skills in clinical diagnosis and interpretation of examination data to establish a diagnosis in accordance with ICD-10.
